

## Little River Sportsman's Association

### Pre-Flood preparation protocol and check list

As of March 2020

**Reference-** We use the Advanced Hydrologic Prediction chart for Little River (SW Georgia) near Hahira (SR 122) located at <https://water.weather.gov/ahps2/hydrograph.php?wfo=tae&gage=hrag1> (cut and paste to your browser for best results)

**Initiation-** Once the river level reaches 148' at the above location the range will begin to experience flooding in 18 hours. Once the graph reaches 148' it is essential at this point that the following check list be implemented ASAP to prevent serious damage and/or loss of range furniture, equipment and supplies. If there is an earlier prediction of reaching 148', which is not always the case, the check list implementation may start earlier.

**Duties-** The President, Vice President, Secretary or designated Board member will make the call to implement this protocol and supervise its execution. He will make the appropriate contacts by phone or text, or use a phone tree system, to all the Board members and appropriate club members setting a time to start the following check list in order to secure the range, furniture, equipment, and supplies.

**Special note-** The 600yd firing point can be used to secure some equipment if an accurate prediction shows the water level at the above location to be no more than 150' throughout the flooding. However, this covered firing point may not protect items from the rain.

#### Check List

##### Wobble trap

Remove battery, wobble trap, foot pedal with cable and move to safe location (usually someone's residence)

Also remove other items which could be damaged

Empty trash can and secure

Exterior clays thrower can be left in place

##### IDPA shed

Remove all items which can be damaged by water, i.e. paper products, paint, range operation items, targets, target maintenance items, etc.

Exterior: tie wood piles into bundles and/or secure to prevent floating away

Secure all wooden props and target stands, which may float, by tying to a tree

Tie down tables and wall props

Move trailers to high ground or off the range

##### Action pistol range

Tie all tables and chairs to roof supports

Empty trash cans and secure

Remove first aid kits (if not secured and waterproof)

Tie "Vigilance Committee" sign to tree

Make sure hand truck is chained to tree

Remove non-permanent signs from Cowboy building fronts

### **Metal shed**

Remove pop-up tents

Remove plastic container with paint supplies

Remove lawn mower with gas can/s to high ground or off the range

Exterior:

    Tie lumber into bundles so they will not float away

    Have dumpster emptied if time permits

### **Center fire and 200yd range**

Tie all tables and chairs to roof supports if not already done

Empty trash and secure trash can

Remove first aid kit (if not secured and waterproof) and Release of Liability Forms

Secure brooms or remove from the range

### **Pavilions**

Put tables, chairs and grill in green shed

Empty trash and secure trash can

Secure brooms or remove from the range

Tie swing to tree if not already done

### **600-yard range and pistol ranges**

Tie chairs and tables to roof supports and secure plastic barrels in barrel cage

Empty trash cans and secure. Secure brooms or remove from the range

Secure wooden wagon or weigh it down. Remove first aid kit (if not secured and waterproof)

### **Cowboy/600yd shed**

Move all paper products to highest storage level or remove from shed

Move number boards to highest storage level

Put buckets inside shed

Remove all plastic containers of rugs (usually taken off the range)

Remove bug sprayer (usually taken off the range)

Remove all generators X 3, and gas cans (usually taken off the range)
